Incredibly Easy: Only one tap to map using GPS location or by drawing objects on a basemap of choice.

Maps Anything: Capture points, lines, and polygons and even geophotos.

Calculates on the Go: Includes area and distance calculations in real time.

Includes Smart Forms: Adds and updates information for any object using editable smart forms.

Centralizes Data: Automatically and seamlessly transfers data to one secure location.

Flexible: Exports to any other GIS and database system.

Customizable: Supports custom basemaps, icons, layers and data dictionaries.

For Whatever You Do in the Field

CAPTURE, ACCESS AND SHARE ANYTHING FROM ONE SYSTEM

MapItFast is unlike any other mapping software you have used before. Designed with field users in mind. With a single tap, users can simultaneously map or draw points, lines, polygons and photos.

MapItFast works offline, anywhere. It comes with aerial, street and topo maps or use your own. Maps on devices and online may be configured with unique icons, layers and data dictionaries.

Attributes are easily added to mapped objects using customized forms and advanced logic built from Excel or from templates.

All spatial and tabular data is automatically synced to a central and secure account where data contributions from the team are viewed and managed in real time. MapItFast includes online capabilities to manage data, print maps and reports, and export to other database and GIS systems.

See for yourself how MapItFast is easy to use and yet enterprise powerful. Get started today. Download the single user mobile app from Google Play for FREE.

NOW CAPTURE AND MAP EQUIPMENT OPERATIONS WITH SNAPMAPPER!

Mapping equipment operations is now available with SnapMapper. SnapMapper is a device that captures points and lines based on actions from equipment or personnel and puts it all into MapItFast.

- **Automated:** Points and lines are triggered by switch and button operation on mechanical equipment or personnel.

- **Eliminate Distractions:** No need to view or interact with the screen of a smartphone or tablet.

- **Integrated:** Use with any MapItFast account.

- **Useful:** Associate a map location whenever push buttons and switches are activated from anybody or anything.
