EXPECT MORE SPRAY TIME
SPEND LESS DESK TIME

AgTerra TECHNOLOGIES

SprayLogger™

AUTOMATED MAPS AND REPORTS POWERED BY

Action Mapper

What is SprayLogger?

MORE JOBS AND MORE TIME TO SPRAY

Mapping, reporting, and sharing by hand takes time you can't afford. With SprayLogger, your team will appreciate the ease of use and recovered time. Your customers will discover another reason they enjoy doing business with you.

DETAILED MAPS

From backpacks to spray rigs with multiple booms, SprayLogger maps all your job activity, including areas where you traveled but did not spray.
SprayLogger records incredible detail every second of your spray job, including time, chemicals used, quantity applied, weather, applicator and more.

AUTOMATED REPORTS

Eliminate computer time with SprayLogger automation. Every application of every job is synchronized between the datalogger and your private cloud account.
The professional maps and reports your customers demand are available with a simple click of the mouse.

EASILY SHARED

Share your data in the way you like or use it in your favorite GIS. SprayLogger comes with the ability to export your data to Google Earth, shapefiles, or CSV.
View and process jobs in real-time from ArcGIS or QGIS with the SprayLogger API and WFS service.

Rapid Start
Start SprayLogger on your Android device with only 1-5 questions. View spray and no-spray activity in real-time.

Every Spray (and No-Spray) Detail
Details such as distance and area, chemical, rig, applicator, weather, time and more are included with every application.

Work Remotely
Datalogger/device storage assures that no data is lost while working in remote, disconnected areas.

Capture Weather Automatically
Temperature, wind, and humidity updated hourly from the nearest weather station. Or manually edit values to match your local conditions.

Use with Third-Party GIS
Easy shapefile export for your favorite GIS and database software. APIs available for real-time connectivity.

Monitor Key Metrics
Visually track key metrics such as total chemical usage and area treated on pre-formatted charts and graphs.

Everything Backed Up
All maps and records are automatically synced to your private account till you delete them. Never worry about backups again.

Securely Share the Way You Want
Print and export maps and reports. You can also freely add view-only users to your account and share just the jobs you want.

Add Parcel Maps
Integrate with MapItFast layersets to view custom reference maps alongside your spray job.

Audible No-Spray Alerts
Give applicators audible and visual alerts before entering, within, and on exiting regions. Perfect for no-spray accountability.

Automated, Detailed Reporting
Pre-formatted, printable reports generated on the fly for a single job or season-long details.

View Operations in Real-Time
View all applications from all applicators while in progress, even with a mixture of spray rigs and backpacks.

What is ActionMapper?
